

GOKULA KRISHNA A

gokulakrishna441@gmail.com • (+91) 6379185957 • [LinkedIn](#)

Languages: JavaScript (React.js, Node.js), TypeScript, Php

Frameworks & Libraries:

Frontend: React Router, Redux, React Hook Form, Material UI

Backend: Express.js, Sails.js, Socket.io , **Databases:** MongoDB, MySQL

API & Technologies: REST API, GraphQL, Redis, Google Analytics, Google Indexing API

Tools & Platforms: GIT, GitHub, SEO, AWS, Jira, Visual Studio Code, TablePlus, ChatGPT, Cursor AI, Perplexity AI

Experience

eNova Software And Hardware Solutions | Coimbatore, Tamil Nadu | Programmer **March 2026 - Current**

- Developed course registration, faculty allocation, and student enrollment management features.
- Collaborated with cross-functional teams to deliver new features, perform code reviews, and maintain application stability.
- Worked extensively with REST APIs, MySQL, PHP (CodeIgniter CI4), JavaScript, jQuery, and Bootstrap to build responsive web applications.

App Innovation Technologies | Coimbatore, Tamil Nadu | MERN Stack Developer **June 2023 - August 2025**

- Built full-stack MERN applications with modular architecture & REST APIs.
- Built features including **dynamic dashboards, admin portals, and user-driven analytics** modules.
- **Developed reusable React.js components, state mgmt. with Redux, and routing with React Router.**
- Designed MongoDB schemas, aggregation pipelines & implemented JWT-based authentication.
- Integrated Stripe & Google Analytics; optimized SEO with SSR where required.

Sai Techno Solutions | Coimbatore, Tamil Nadu | Web Developer **June 2022 - March 2023**

- **Built static web pages with HTML/CSS; contributed to minor frontend updates.**
- Explored **HTML elements**, tags, and semantic structure to build accessible and SEO-friendly web layouts.

Besant Technologies | Bengaluru, Tamil Nadu | Intern **November 2022 - April 2022**

- Developed full-stack web applications using JavaScript, React.js, Node.js, Express.js, and MongoDB.
-

Projects

Teemie – Scheduling & Payroll App: Built roster management UI (React.js), REST APIs (Node.js/Express), real-time notifications (Socket.io), and secure role-based access.

InstantRo – Automotive Platform: Engineered backend workflows in Node.js, integrated ScraperAPI (PHP), created dashboards with React.js/Chart.js, optimized heavy data ops with Redis.

Footprints – Retail Media Network: Developed React.js modules for campaign mgmt., integrated APIs for shopper analytics, and built admin interfaces for retailers.

eNova ERP Product – University ERP: Developed ERP modules for student, faculty, and administrative workflows using **PHP (CodeIgniter), MySQL, JavaScript, and Bootstrap.**

Education

Bachelor of Mechanical Engineering | Anna University

Sengunthar Engineering College, Tiruchengode (June,2015 to May,2019)
